

LATEST PRODUCT DEVELOPMENTS FOR THE BREWERY INDUSTRY

ELIMINATE MANUAL HANDLING... WEIGHTLESS OPERATION... INCREASED SPEED OF OPERATION... SINGLE OPERATOR... LOW MAINTENANCE... IMPROVED SAFETY OF OPERATION... IMPROVED OPERATOR DEPLOYMENT

Palamatic provided a solution at the Black Sheep Brewery for handling full casks. Horizontal casks are turned upright and then palletised.

Palamatic's Vacuum Tube Lifter shown here handling 120kg kegs from warehouse to pallet.

Palamatic helped to provide a solution to this manual handling problem in a tanker loading/unloading area by providing Hoists to lift the 50kg hoses to the tankers.

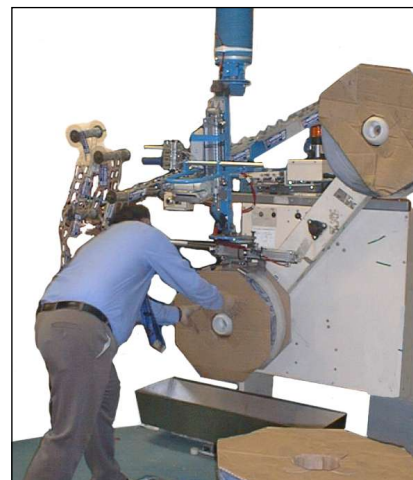

This Palamatic Manipulator was specially developed to load reels onto Kister machines. The reel is lifted and rotated 90° along with push and retract reel feature to prevent any operator interface. Shown above is an on site picture of the confined space into which the reels are lifted.

Left: A specially designed pneumatic gripper secures the kegs during the emptying process. Suitable for beer destruction, recycle or stacking. Operator friendly controls are conveniently mounted in one location for ease of use.

Right: This handling device was developed to handle reels from horizontal and place vertically onto a Hi-Cone machine. Also had facility to rotate 360° in horizontal plane for left and right handed Hi-Cone machines.

PRODUCT INFORMATION

LOAD CAPACITIES:

- Generally loads between 20 and 150 kg are encountered in the brewery industry

TYPICAL PRODUCTS HANDLED:

- Kegs/Drums 9, 11, 18, 22 gallon
- Hoses
- Reels
- Sacks
- Crates/Boxes
- Pallets

FEATURES:

- In-built safety features make Palamatic units some of the safest available on the market today
- Pneumatic or electrically powered systems

- Reliable and robust

- CE labelling and certification on all systems

FINISH OPTIONS:

- Mild steel painted to customers requirements

STANDARD OR TAILOR MADE SYSTEMS AVAILABLE:

- Vacuum Tube Lifters
- Manipulators
- PneuLifts
- PneuHoists
- Automatic Sack Opening Machines
- FIBC Systems
- Discharge Systems
- Pallet Trucks
- Service and Spares

Standard Systems

Vacuum Tube Lifter handling sacks

Vacuum Tube Lifter handling boxes

PneuLift 'C' handling kegs

Low Headroom

Universal cable hoist, which is an ideal handling system in low headroom environments.

Drum pouring is no problem with our unique Horizontal Vacuum Tube handling device.

Powder Processing Systems

Automatic sack discharging machines which are suitable for handling filter aid such as diatomaceous earth in a dust tight process. An operator exposure level report identified the requirement for contained handling of this carcinogenic product within brewing and wine making industries.
