

SACK LIFTING

Palamatic handling systems for sacks

Paper Sacks

Manipulator - suitable for low headroom situations

Plastic Sacks

Vacuum Lifter

MARKET LEADERS IN THE DESIGN AND MANUFACTURING OF MATERIALS HANDLING EQUIPMENT

WHY CHOOSE PALAMATIC?

Sack handling is a common problem for a lot of industries. Palamatic have developed a wealth of knowledge over fifteen years that is unrivalled in the world of vacuum lifting. When sacks have to be handled for processing and production, Palamatic's vacuum lifting systems perform this operation in a safe, efficient and cost effective manner in the most demanding of environments. Operators no longer have to endure the backbreaking effort involved in repetitive lifting. Total control by one person gives effortless vacuum powered lifting. Palamatic have the answer for all types of paper, plastic and hessian sack handling applications with weights ranging from 5-110kg catered for. If speed is a factor, the operator can maintain throughputs of 6-9 sacks per minute (depending on area covered).

Polywoven Sacks

Vacuum Lifter - with extended handle feature for high stacking

Hessian Sacks

Vacuum Lifter - with spike gripper feature

Plastic Sacks

PneuLift - with gripping feature and extended handle for placing sacks into drums

Paper Sacks

Vacuum Lifter

The benefits of Palamatic lifters include **effortless lifting, increased productivity, increased operator safety and performance.** All giving you a low maintenance, high efficiency system.

MANUFACTURED IN THE UK

'H' Style - used for covering large working areas. Supported from either floor mounted support pillars or existing structural steel work.

With *Telescopic Bridge Beam*, ideal for reaching into restricted areas.

With *Raised Bridge Beam*, ideal in low headroom situations.

With *Extended Rail* to allow for Horizontal Tube Unit and vacuum hose bunching whilst maintaining large area coverage.

With three *Downtrack Rails* enabling the operator to cover larger working areas with a Horizontal Tube Unit.

With *Dual Bridge Beam*, ideal for mounting of Manipulators.
